

Position Title:

Senior Process Engineer

Position Location:

Richmond, British Columbia

Position Description:

As Senior Process Engineer, reporting to the Engineering Manager, you will be responsible for undertaking a wide variety of process design and control engineering activities to support the efficient design and development, manufacturing, installation, commissioning and startup, and ongoing operation of our systems throughout the world. You will be a key asset in the development and growth of the organization through ongoing improvement and product development.

Key Responsibilities:

- Guide designers with generating PFD's and P&ID's.
- Develop and maintain equipment specifications.
- Prepare process and control descriptions, narratives and control requirements.
- Develop and maintain equipment lists, instrument lists and line designation tables.
- Provide support to other engineers and designers in the Engineering Department.
- Participate in product development and new process designs.
- Analyze feedback from field personnel to solve operational issues, identify and implement opportunities for improvement to systems, equipment and controls.
- Support the Applications Department to review and prepare preliminary designs for proposals.

Key Qualifications:

- Bachelor's Degree in Chemical Engineering, or equivalent with strong mechanical aptitude.
- 10+ years of experience. Minimum 3 years in water and effluent treatment.
- Registration as P.Eng. with APEGBC.
- Professional individual with excellent interpersonal and organizational skills.
- Excellent verbal and written communication skills.
- Proficiency with AutoCAD or Solidworks is an asset.

Salaries will be based on experience. Email cover letter and resume to Tyler Borges: tborges@sttenvirocorp.com. Resumes without cover letters will not be reviewed.

About STT Enviro Corp:

35 years of experience in client service

At STT Enviro Corp we are continually seeking innovative and ambitious individuals to join our team. Offering a great client experience for our customers begins with creating a great workplace for our employees.

Innovation, collaboration and excellence for our clients

Employees can expect to work in an environment that offers professional growth, mutual-respect and collaboration. We encourage our employees to bring a desire to change and improve both what we do and what they do so that as a company and as individuals we can continually raise the bar in excellence. STT Enviro Corp has set a goal to provide our clients with the most cost effective life cycle solution for each product we offer. To do so we need people who want to constantly grow and deliver the best that is possible and to work at continually improving it.

Job fulfillment for ourselves

In our mission statement we commit to deliver to our client's expectations while adhering to rigorous quality standards and safety practices. We also commit to conduct our business in an ethical manner and that our products will be designed and engineered with conscious effort to reduce environmental impact in order to help make our world a slightly better place.

Think you have what it takes?

Are you smart, innovative and empowered by working as a team-player, but also want to work somewhere with a stated higher purpose? If you aren't afraid of new challenges, raising the bar of excellence and have a real commitment to the values and ambition we have then we want to hear from you!
